Certified Scrum Master	2022

LANGUAGES

Dutch	C2
English	C1

SUMMARY

Full-stack engineer with nearly a decade of experience across diverse domains, from government and large enterprises to smaller organisations. Strong in JavaScript/TypeScript, Node.js, Python and PHP with Angular, React, Vue, Laravel, Django and NestJS. Also experienced with AWS, Azure, CI/CD and data engineering. I value code quality and have extensive experience with unit testing using Jest, Pytest and Vitest, as well as Cypress. Outside of work I deepen my knowledge of IT topics and write technical blogs.

EXPERIENCE

Mikrocloud

Jul 2025 — Present

Lead Full Stack Developer | Laravel · Nuxt.js · AWS · MySQL · Mikrotik RouterOS · PHP · Stripe · Docker

Lead developer on an SD-WAN platform for Mikrotik RouterOS devices, built with Laravel on AWS Lambda (via Laravel Vapor), Nuxt.js and microservices via SQS. Writes RouterOS scripts for remote configuration and is responsible for architecture and infrastructure.

Webshopimporter

Sep 2024 — Present

Lead Full Stack Developer | PHP · Laravel · Django · MySQL · Github Actions · Magento · Shopify · WooCo...

Lead developer managing an application that synchronises supplier data to e-commerce platforms such as Shopify, WooCommerce and Magento. Collaborating on a migration from CodeIgniter to Django and building integrations via REST, SOAP and FTP, even when supplier documentation is complex or incomplete.

Swiftsync

Sep 2024 — Present

Full Stack Developer | Django · NiceGUI · Playwright · CCVShop · Wordpress

Full-stack developer building custom software solutions based on client requirements, using frameworks such as Django, NiceGUI, Playwright and Pandas. Built a CCVShop management dashboard, a configurable web scraping dashboard and a Wintree product synchronisation tool.

Chary Solutions

Jul 2024 — Present

Senior Developer | Javascript · Klaviyo · Playwright · Lightspeed · Shopify · WooCommerce · CCVShop

Senior developer building marketing integrations between platforms not supported by Klaviyo, using Google Tag Manager and various APIs. Also builds internal automations and tools integrating Gemini's API to categorise data.

SPAR

Jun 2024 — Dec 2024

Data Engineer | Python · Pandas · SQL · Azure DevOps · PySpark

Data engineer at a major Dutch retail chain, parsing and mapping big data using Azure Data Factory, Azure Databricks, Pandas and PySpark to split workloads across multiple instances.

ING

Apr 2022 — Sep 2023

Full Stack Developer / Product Owner | Lit · Javascript · Typescript · Azure DevOps · ESLint

Full-stack developer and product owner at ING, building banking interfaces with Lit web components, CI/CD pipelines and custom ESLint rules. As product owner, set realistic expectations and made every deadline by keeping team capacity and stakeholder goals aligned.

SVB

Apr 2021 — Apr 2022

Frontend Developer | Angular · Javascript · Jenkins · Cypress

Frontend developer at SVB, working on a translation layer dashboard between legacy AngularJS and Angular. Used Jasmine for testing and Jenkins for CI/CD pipelines.

MedWeb

Sep 2019 — Aug 2020

Software Developer / Intern | Vue.js · Chart.js · LotusScript · HCL Notes

Software developer who started as an intern building a data visualisation portal for medical professionals with Vue.js and Chart.js. Retrieved large datasets from HCL Notes using LotusScript and transformed them into clear charts and graphs.
